EDUCATION

Supreme Institute of Management and Technology
Bachelor of Computer Applications (BCA)

Mankundu, West Bengal, India
Expected July 2027

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Typescript

Backend: ASP.NET Core, Node.js, C#, Java

Database: SQL Server, MySQL, SQLite, MongoDB

Libraries & Packages: Entity Framework Core, Hot Chocolate GraphQL, SignalR, FluentValidation, Serilog, Hangfire, Swagger, Scalar, Bogus, NUnit

Tools: Git, Bitbucket, Jira, Figma

WORK EXPERIENCE

Koushiki Software

India

Full Stack Developer Intern — ASP.NET Core, React.js, SQLite, SQL Server

Sep 2025 – Present

- Spearheaded the development of scalable enterprise web applications using ASP.NET Core and React.js, implementing robust RESTful APIs with secure authentication and optimized database queries.
- Resort & Restaurant Management System:** Developed end-to-end frontend and backend modules for dynamic property operations. Implemented role-based access control (RBAC), real-time booking management features, and seamless data synchronization using SQLite.
- Hardware Plus – Inventory Management System:** Architected robust Admin Panel functionalities for comprehensive inventory tracking. Built complex data grids, automated stock threshold alerts, and maintained core product management features using SQL Server.
- Hardware Plus Mobile Application:** Engineered tailored backend REST API endpoints and data models optimized for mobile payload efficiency to effectively support the React Native application development team.
- Actively participated in Agile development workflows, engaging in daily stand-ups, code reviews, and utilizing Git, Bitbucket, and Jira for rigorous debugging, testing, and continuous application maintenance.

PROJECTS

E-Commerce Website | MERN Stack

- Built a scalable, full-featured e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), encompassing dynamic product catalogs, advanced filtering, and centralized inventory management. Engineered a responsive, intuitive frontend with React and Redux for seamless shopping cart functionality and real-time state synchronization. Implemented robust RESTful APIs with Node/Express, secure JWT authentication, and automated order processing integrated with payment gateways.

Restaurant Management System | Advanced Java, MySQL

- Engineered an enterprise-grade, multi-tenant web application for streamlined restaurant operations, centralizing real-time POS food ordering and dining table reservations. Architected a dynamic Role-Based Access Control (RBAC) system to securely manage staff permissions across custom workflows. Leveraged Hibernate ORM for automated schema generation and data persistence with MySQL, while integrating an interactive analytical dashboard and automated PowerShell scripts for 1-click server deployment..

ADDITIONAL INFORMATION

- Achievements:** Participated in the Smart India Hackathon (SIH), 2024.
- Languages:** Proficient in English, Hindi, and Bengali.
- Strengths:** Problem Solving, Team Collaboration, Quick Learner, Adaptability, Clean Code Practices.
